

MIMER MEDICAL COLLEGE PRESENTS

8th International Rhinoplasty Workshop

Course Director : Dr. Virendra Ghaisas

February 14th to 16th, 2025
Venue: Hotel JW Marriott, S.B.Road
Pune, India

8TH INTERNATIONAL RHINOPLASTY WORKSHOP
FEBRUARY 14TH TO 16TH, 2025

Operating Faculty

Prof. Dr. Wolfgang Gubisch
Prof. Dr. Wolfgang Gubisch is the world leader in the field of Facial Plastic Surgery & Rhinoplasty. He is a Professor at Marien Hospital, Stuttgart, Germany. He is a teacher par-excellence and many of his students are leading facial surgeons in many parts of the world.

Dr. Abdul Kadir Goksel
Dr. Abdul Kadir Goksel is a world famous rhinoplasty surgeon from Istanbul. He is the founder of Rinobstanbul clinic & the founding member of the International Rhinoplasty Research Society. He specializes in structure preservation rhinoplasty, nasal tip aesthetics and revision rhinoplasty.

Dr. Sebastian Haack
Dr. Sebastian Haack is a well-known Plastic Surgeon & Medical Director at the Marien Hospital, Stuttgart, Germany. His main interest is primary, secondary and reconstructive rhino-surgery.

Dr. Konstantin B. Lipski
Dr. Konstantin B. Lipski is a renowned plastic and reconstructive surgeon who has served as the Vice-president of the Russian Society of Plastic Reconstructive and Aesthetic surgeons. His areas of interest include functional and aesthetic rhinoplasty, revision surgeries and tissue engineering.

Dr. Virendra Ghaisas
Dr. Virendra Ghaisas is a well-known Rhinoplasty Surgeon from Pune and is the Chief Surgeon at Pune. He is also the Executive Director at MIMER Medical College, Talegaon Dabhade, Pune.

Dr. AbdulAziz Al Azri
Dr. AbdulAziz Al Azri is a Leading Rhinoplasty Surgeon in Oman, a well-known expert in both primary and revision surgeries. He underwent his training in the UK and he has instructed many cadaveric dissection courses. He contributed in training many rhinoplasty surgeons in his country.

March 2025, Vol 4 Issue 1

8th International Rhinoplasty Workshop was conducted in February from 14th to 16th, 2025.

Activities

**Clinico-Pathological Presentation- 01/2025
held on 30-Jan-2024
Dr Anusha Venkatraman, JR2**

**R & D cell Monthly Session conducted
by Prof. Dr. Santhosh K Rajamani
on- 07th March 2025**

**SKIT program by interns on the occasion
of World Hearing Day Celebration 2025 on 07 March 2025
Date & Time 07-March-2025 11 AM to 1.00 PM**

**Endoscope
HAWK 0 and 70 degree Sinuscope 4mm and Portable Endoscopy
unit purchased in Jan 2025**

This is to certify that

Santhosh Kumar Rajamani

has achieved IOP Trusted Reviewer status in recognition of an exceptionally high level of peer review competency.

Congratulations on this achievement and thank you for your contribution to ensuring quality and trust in peer review.

Activities

Online Guest Lecture on Singer's Voice- Evaluation and management was conducted in ENT Department on 22nd April 2025. Prominent laryngologist, Dr Reshmi M Nair addressed the room via zoom call and delivered a informative talk and presentation to enlighten the crowd about the different aspects of analysing and managing singer's voice problems.

Dr Kautubh Patil participated in a Student exchange/elective postings with Sri Guru Ramdas University of Health Sciences Sri Amritsar from 5th March to 15th April under our MOU.

Activities

On the occasion of World Voice Day 2025 on 15 April 25, An awareness talk was conducted among students from class-nursery to x highlighting the importance of vocal hygiene, factors contributing to voice problems specially in school children, teachers and other professional voice users.

FREE Septoplasty Camp was held at Dept of E.N.T, Dr. BSTR Hospital, Talegaon Dabhade from 8th to 15th May 2025 on the occasion of Birth anniversary of Late Dr. Suresh Ghaisas.

VEDPATHAK Shashank	MIMER Medical College Talegaon D Pune Maharashtra, Железнодорожная станция Дорога, Talegaon D Мавап Пана Махараштра, Пана, 410507, Индия sbvedpathak@gmail.com

Ключевые слова: эксперимент, *Nechamandra alternifolia*, *Hydrilla verticillata*, *Najas indica*, Гистология, Сравнительная гистология, Сорняк, Водные макрофиты, Гистология растений, Микрокосмы влажных препаратов, Клеточная адаптация, Hydrocharitaceae, Инвазивные виды, Анатомия листьев, Распределение хлоропластов, Краевые колочки

Аннотация: *Nechamandra alternifolia*, единственный вид в монотипном роде *Nechamandra*, часто упускался из виду в научных исследованиях, несмотря на его уникальный эволюционный статус и значительный экологический потенциал. В этом исследовании представлен углубленный гистологический анализ *N. alternifolia*, раскрывающий ряд примитивных и специализированных анатомических особенностей, которые отличают его от других водных растений. В отличие от более развитых видов, *N. alternifolia* имеет высокоталлоидную структуру, лишённую нутеллы и устьиц, а также лишена аэренхимы, что предполагает более базальную адаптацию к его водной среде обитания. Сосудистая система *N. alternifolia* удивительно примитивна, состоит исключительно из флоремы без ксилемы, а ее сосудистые пучки простые и не одревесневшие. Растение также демонстрирует примитивные шпиги и уникальные розовые пигментированные клетки, которые, как считается, усиливают поглощение синих длин волн, что жизненно важно для фотосинтеза в условиях открытой воды. Отличительной чертой *N. alternifolia* является расположение его овальных хлоропластов, которые стратегически расположены вблизи клеточной стенки в конфигурации пластины. Такое расположение в сочетании с активным цитоскелом, вероятно, является адаптацией для оптимизации фотосинтеза путем максимального захвата света и эффективности в его специфической клеточной архитектуре.

Эти гистологические характеристики не только подчеркивают эволюционное значение *N. alternifolia*, но и его способность адаптироваться к определенным экологическим нишам. Несмотря на свою, казалось бы, примитивную анатомию, вид демонстрирует высокий потенциал инвазивного поведения, особенно в неместных средах, где его колонизация может нарушить местные экосистемы. Учитывая его агрессивность и последствия его инвазивного потенциала, это исследование выступает за усиление внимания исследователей и проактивные стратегии управления. Наши результаты заполняют критический пробел в ботанической литературе и подчеркивают важность признания *Nechamandra alternifolia* как вида, представляющего экологическую и эволюционную озабоченность. A Comprehensive Review of Molecular Mechanisms Involved in Development of Porphyria, Due to Defective Porphyrin Biosynthesis in the Human Body

Santhosh Kumar Rajamani^{1*} and Radha Srinivasan Iyer²

¹MAEER MITT Pune's MIMER Medical College and DR. BSTR Hospital, Talegaon D, Pune, Maharashtra, India

²Neuro-physiotherapist, SEC Centre for Independent Living, Naigaon, Pune, Maharashtra, India

Abstract

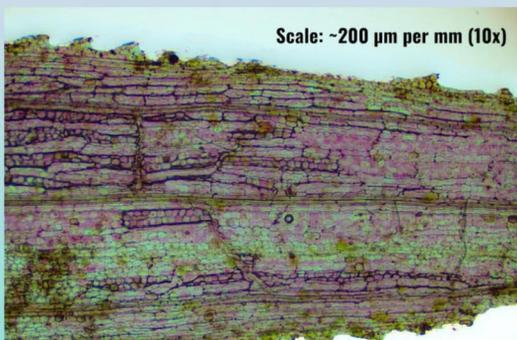

Porphyrins are cyclic organic molecules comprised of four pyrrole rings, linked by a methine bridge, consisting of the double bond of carbon atoms, which form a chelation compound with a metal ion like magnesium, cobalt, iron, or nickel in the center. Porphyrins form the basis for many biologically important haem proteins like hemoglobin and myoglobin, cytochromes, cobalamine (vitamin B12) in animals, and chlorophyll in plants. Defects in the endogenous synthesis of porphyrin rings in humans lead to a medical condition called porphyria. These are characterized by congenital enzyme defects in molecular pathways leading to the accumulation of intermediate porphyrin products that exhibit cellular and metabolic toxicity in a myriad of ways. Enzyme blocks can also be acquired later in life, like for example lead poisoning. This chapter explores the manifestation of the various clinical features based on molecular mechanisms.

Keywords: Porphyrins, porphyrias, porphyrin synthesis, congenital enzyme defects, metal chelation
