APRIL - JUNE, 2023

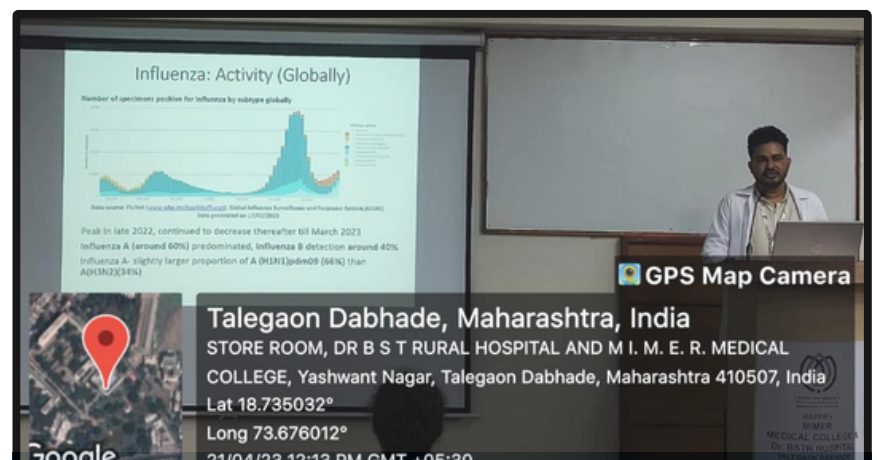

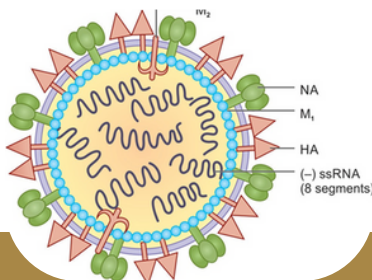

Review of Antibiotic Policy

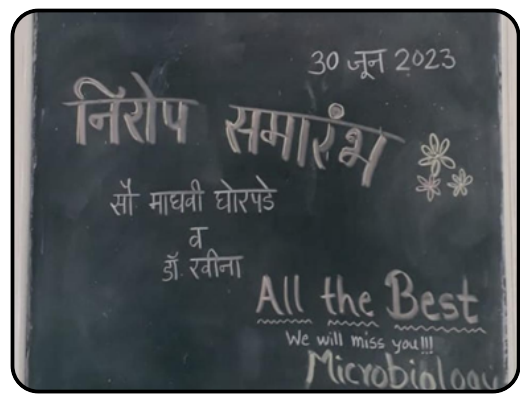

Antibiotic policy related polling performed with Medicine and Surgery department (28th & 29th April)

The review of an antibiotic policy of a hospital on an annual basis is crucial for effective infection management, antimicrobial stewardship, patient safety, and cost-effectiveness. By staying updated with emerging resistance patterns and maintaining evidence-based guidelines, hospitals can provide optimal care to patients while combating the growing challenge of antibiotic resistance.

Monthly Research Society Meeting from the department of Microbiology happened on 21st April 23

Topic- Re-emerging influenza virus infections
