TOPIC : Mucormycosis: An Emerging Challenge in COVID-19

DATE : 9th June 2021 (Wednesday)

TIME : 2 to 3:45 PM

VENUE : *Sushrut* Hall, MIMER

Post-COVID Mucormycosis is a potentially fatal fungal infection that can be devastating for the patient, who is barely recovering from a treacherous viral infection. This is nothing short of - 'from the frying pan - into the fire' scenario. Only an aggressive and a multidisciplinary approach can efficiently manage this potentially fatal condition.

This CME has been organized to present an overview of the condition from the perspective of some of the medical specialties involved in its management.
